

Water

- We water our hedges, trees and massifs with a drip irrigation system fed by untreated agricultural water.
- a consumption monitoring counter to detect possible leaks.
- Toilets, public water points and rental buildings are equipped with water-saving appliances.
- Our staff is trained in leak detection

Energy

- Moving in the campsite, with an electric car
- Some of the hot water production in sanitary facilities is provided by solar energy (solar panels).
- The pool is heated by a heat pump to reduce the energy consumption.
- All rental, sanitation and public lighting are equipped with low energy bulbs.
- Electrical equipment (refrigerator, oven, etc.) of the lodges are classified in economic category A or A +.
- We met monthly water and electricity meters to better manage consumption.

Waste

- The campsite has an area dedicated to selective sorting.
- Hazardous waste and used food oils are stored separately and collected by specialized recycling companies

Cleaning

- The cleaning products we use are certified ecologically.
- We do not use chemical fertilizers but natural fertilizers.
- We recover some of the green waste to make compost.

Landscaping

- We planted over 40 trees and shrubs that are only local species.
- We prefer natural materials in our outdoor wooden siding equipment of rental and pitches, wooden playground etc ..
- Landscape integration of the camp for rental and building, burial of power lines.
- We offer you a natural site where the rest, the calm are assured.

Customers

- We promote exchanges by mail.
- We offer walks, discoveries and nature tours.
- Vehicle traffic is prohibited from 23H30 to 6H00 in the campsite.
- We offer bicycle rental on site.
- We educate our customers about selective sorting and energy saving.
- We offer a sanitary and disability-friendly location to accommodate everyone under the best conditions.
- We seek your input and suggestions to improve our environmental approach.
- Sensitization of customers and staff to respect for the environment by posting rules and distributing documentation on good practices and gestures adopted (selective sorting, recycling, energy saving) and training.
